

Summer Employment at **Creative Conners**

Are you a student interested in a summer job working in scenic automation? Fantastic! We are the biggest little automation company and want you to come work with us. Read on to see if this sounds like a good fit for you.

What it is

Creative Conners offers a small number (like 1, 2, or very rarely 3) summer positions for students seeking work in scenic automation. These openings typically run from mid-May to mid-August, but there is a little flexibility in both the start and end date (+/- 1 or 2 weeks).

We are a proudly small opinionated company, built and staffed by automation enthusiasts. Each full-time member of the staff contributes in several ways to sell, produce, ship, install, and support our software, electronic controls, and machinery. While people naturally have a favorite area, each person here is effective in at least two major disciplines.

Students that work with us for the summer are 100% part of our team. You do real work, with real expectations, and real consequence. However, we expect that you are not yet an expert in the field and may still be figuring out where your strengths lie (and what things you really dislike). To help you figure that stuff out, you will get a chance to work in all areas of production. Typically after you've done the circuit of controls, machinery, and software you'll concentrate in one of those areas for the duration of your time with us. We try to find the spot that both suits your interest and gets the best products out the door.

You will primarily build, test, and ship machinery and control systems. If your main interest lies in design or software development, we will schedule some reps working with our designers and developers. However, most of the time will be spent with your hands on gear, which aligns with how we think designers and developers should be forged.

What it is not

A summer position at Creative Conners is not an internship or an extension of school. We hope you learn stuff while you are working here, but our focus is delivering kick-ass automation products to our customers and we expect you share that priority. The flip side is that you will not be given inconsequential busy work to fill your time. You will have the opportunity to work on cool stuff (but even cool stuff requires a lot of hard, tedious work—you've been warned).

Location

The shop is located at:
84 Cutler St
Unit 7
Warren, RI 02885

Pay

\$20/hr for 40 hours per week.
Overtime (1.5x) paid for any time beyond 40 hours in a week.

Hours of operation

The shop is open from 8:30am to 5:00pm EST M-F.
Technical support is available by phone through the weekend.

Housing

We do not provide housing, but there's a variety of housing available for the summer. Warren is a quirky quiet little town, but close to the shop. Providence is 20 minutes away by car (longer by bus, but there is one) and has more options for fun stuff on nights and weekends.

To Apply

If this sounds like your kind of job send a resume, cover letter, and any portfolio links to careers@creativeconners.com.
